Work Experience

Lead Engineer • HCL Technologies Pvt. Ltd

Oct 2021 - Present (1 years 4 months)

GigaVUE • Gigamon Pvt. Ltd

GigaVUE-OS is a modularly designed operating system that offers the full range of Gigamon Hawk capabilities, including: Core Intelligence: Flow Mapping®, GigaStream, Clustering, Fabric Maps, Header Stripping, Tunneling, Inline Bypass. Traffic Intelligence. Application Intelligence. GigaVUE-FM fabric manager simplifies and automates the configuration, management, and operation of the Gigamon Hawk Deep Observability Pipeline, with unified visibility across physical, virtual, and multi-cloud deployments. Its intent-based policy automation approach enables NetOps, SecOps, and CloudOps teams to be more efficient at creating and deploying policies at scale based on their roles. A centralized, rich, and customizable dashboard provides easy-to-use programmable APIs for ease of integration with tools and SDN controllers, role-based access control, end-to-end topology visualization, simplified workflows, external SNMP support, and alarm management to reduce mean time to resolution.

Sr. Software Engineer • 3G Solutions Pvt. Ltd

Sept 2020 - Oct 2021 (1 year 1 month)

OmniNewgenOfficeAddIns • Newgen Technologies Pvt. Ltd

OmniNewgenOfficeAddIns client is provided as Add-Ins on Newgen OmniDocs, which enables uploading of documents from MS Office applications directly. The Newgen product (OmniDocs) will open in MS Office directly, which is developed in ReactJS + Redux for front end & Java as backend. OmniNewgenOfficeAddIns client also facilitates the uploading of documents using Newgen Forms. Users can upload documents to the Newgen OmniDocs folder through various MS Office applications. I worked on the UI part of this project using React and Redux as framework.

Software Engineer • Reppify Pvt. Ltd

Apr 2018 - Sept 2020 (2 years 5 months)

Referral Portal • IBM Corp. & Infosys Pvt. Ltd

We have developed a Web Application for Infosys Recruitment Process. In this system, Super admin, Admin Recruiter, HR Recruiter, Employee, and Candidate are the main roles. In this system, there are also Super admin, Admin Recruiter, HR Recruiter, Employee, and Candidate are the main roles. In this system, Super Admin will enroll an Admin recruiter and an Admin recruiter will create jobs for in particular country and the HR recruiter will enroll employees who will upload his/her LinkedIn/Facebook/Twitter contacts the account for whom we do the scoring and matching process and find out, contacts that are most suitable for the job.

Once matching is done, the HR recruiter can see those connections on her account as well and send a request to the employee to invite that candidate to apply for the job. Jobs have referral bonuses as well, which goes to the employee.

RSVP Services • ICL Systems (Irvine, CA, USA)

ICL is the leading provider of systems solutions designed for the needs and challenges of the finished vehicle supply chain. Only ICL offers seamless integration and total visibility in all segments of the finished vehicle pre-delivery and transportation process. Some of its clients using their flagship product are - Toyota Canada, Toyota USA, Volkswagen USA, Fiat Chrysler, etc.

Associate Analyst • Global Logic Pvt. Ltd

Aug 2017 - Apr 2018 (8 months)

Google Shopping Engine • Google Corp.

This is a web-based shopping engine. It includes millions of products and includes different product categories and its subcategories, like household, beauty products, different types of Paints, Pesticides/Insecticides, etc. We need to categorize the products based on their use.
